PROFILE

Web Developer with expertise in Node, React, Prisma ORM, PostgreSQL, and MongoDB, experienced in both microservices and monolithic architectures. Currently at StepX Technologies (Hyderabad), building and optimizing scalable web applications. Seeking opportunities that offer career advancement, the chance to work on large-scale projects, and long-term stability in a growth-oriented organization.

SKILLS

JavaScript	MongoDb & Postgress	Node & React
Prisma ORM	Version Control (Git)	Swagger & Postman

PROFESSIONAL EXPERIENCE

StepX Technologies - Software Developer Intern   **Feb 2025 - Present**

Triumph (Motorcycle Company – Internal Management System, Microservices)
- Built and maintained microservices-based modules including finance, expenses, vendors, sales, audit, collections, and monitoring (system health checks).
- Developed backend services with Node.js, Prisma ORM, PostgreSQL and contributed to frontend features in React.
- Ensured modularity, maintainability, and smooth system operations.

Farmkart (E-commerce Platform for Agriculture Products, Monolithic)
- Developed the monolithic backend, e-commerce website, and admin panel.
- Implemented features such as Excel data extraction/import for inventory and master items and admin-controlled product and order management.
- Designed scalable database solutions with PostgreSQL + Prisma ORM.

Collaborated via Bitbucket for version control, coded in VS Code, and delivered production-ready systems. Enhanced expertise in microservices and monolithic architectures, backend optimization, and fullstack development (Node.js + React).

Crest Infotech   **May 2024 - Dec 2024**

Nodejs Trainee

- Obtained practical experience in backend development with MongoDB, Express, and Node.js.
- RESTful APIs with JWT authentication, OTP verification, and a mailing system were designed and secured.
- APIs were documented and tested using Postman and Swagger UI.
- Created an admin panel for database management using EJS.
- GitHub was used for collaboration, and Git was used for version control.
- Improved comprehension of the practical operation of API integration and backend systems.
- Applied Express Validator for input validation and API reliability.
- For development purpose used Visual Studio Code.

EDUCATION

Bachelor of Engineering
Information Technology
Shantilal Shah Engg. Co. (GTU)
Bhavnagar, Gujarat | 2020 - 2024

Higher Secondary School Certificate
Group-A (Maths)
Dr. Nakadar Institute of Knowledge
