WEB DEVELOPMENT

As a software engineer intern at Crest Infotech since May 17, 2024, I specialize in web backend development with Node.js, MongoDB, JavaScript, and Express.js. I aim to leverage my skills and experience to secure a full-time backend development role after my six-month internship. Passionate about emerging technologies and innovative solutions, I thrive in collaborative, cross-functional team environments.

KEY COMPETENCIES

Backend Development	Database Management (mongoose)	Effective Error Diagnosis
API Development	JavaScript Expertise	Version Control Management
Node Framework	Code Optimization	Continuous Learning

PROFESSIONAL EXPERIENCE

Crest Infotech   **May 2024 - Present**
Web Backend Development Intern
- Engaged in backend development using Node.js.
- Worked with MongoDB, JavaScript, Node.js, and Express.js to develop scalable web applications.
- Implemented RESTful APIs and handled database operations.
- Developed API web backend projects showcased on **GitHub repositories**.

Infolabz   **July 2023 - August 2023**
Web Developer Intern
- Developed a dynamic web page using React.
- Covered fundamentals of JS & ES6, and integrated APIs with the React framework

Web Forum (GTU)   **2022 - 2023**
Project Contributor
- Collaborated in a university-based team project to develop a web forum.
- Enhanced skills in teamwork, creativity, and adaptability.
- Utilized PHP, MySQL, and Bootstrap for development.
